PROFILE SUMMARY

- I am an organized and creative Information Technology graduate with hands on experience in web development (Front-end), UI/UX design, networking (LAN & WAN), database management, ICT support and troubleshooting hardware/software issues. I am proficient in operating systems (windows & linux), HTML, CSS, basic JavaScript, Python and MySQL. I am highly motivated and with strong communication, coordination and data management skills. Experienced in handling operation-related tasks such as data tracking, reporting and team coordination. I am proficient in Excel, Google Sheets and digital systems.

CAREER OBJECTIVE

To contribute meaningfully to a dynamic and progressive organization by applying my skills, knowledge and strong work ethic, while continuing to grow professionally in a challenging and engaging environment

EDUCATION

2021 to 2025: **Karatina University-Bachelor of science in Information Technology**

2017 to 2020: **Mugumo Girls High School-Kenya Certificate of Secondary Education**

2009 to 2016: **Gloryland Academy-Kenya Certificate of Primary Education**

WORK EXPERIENCE

Voter Registration Clerk

Independent Electoral and Boundaries Commission (IEBC)

March 2026-Apr 2026

Assisted in voter registration and verification processes.

Captured and updated voter details accurately using biometric registration systems.

Guided voters through registration procedures and responded to inquiries professionally.

Ensured proper handling and confidentiality of voter information and documents.

Maintained accurate records and prepared daily registration reports.

Worked under strict timelines to support efficient electoral operations.

Customer Service Executive

Lay Technologies Limited

June 2025-December 2025

Managed email services, online submissions and basic troubleshooting for clients.

Assisted customers with cyber services including printing, photocopying, scanning and internet access.

Handled customer payments and maintained daily service records.

Provided polite and efficient customer service to a diverse range of clients.
Typed and formatted documents such as CVs, letters, reports and online application forms.

Office Assistant

Ruiru Pamoja Investors - Real estate

May 2023-Sep 2023

I Welcomed visitors and clients maintaining a professional first impression

Handle incoming and outgoing calls, inquiries and messages from clients efficiently

Scheduled appointments for property viewing and meetings with agents
Managed front office operations including filing, record keeping, documentation and report handling

Supported the administrative team with data entry, emails, and general office tasks.

ATTACHMENT – Kerugoya County Referral Hospital

Assisted in troubleshooting and resolving hardware and software issues for hospital staff

Installed, configured and updated computer systems and application software

Provided technical support to users on system usage, printers and network connectivity

Assisted in network setup and basic maintenance, including LAN connections

Helped with data entry, system updates and record management

Performed routine system maintenance and virus scanning

Assisted in user account setup and password resets

Supported the IT team in system monitoring and reporting technical issues

Observed and assisted in maintaining hospital information systems

Ensured adherence to data confidentiality and IT policies

PROJECTS

Personal Portfolio Website

Created a responsive personal portfolio site using HTML, CSS and JavaScript. Included sections for skills, services, projects and contact information.

Veterinary Services Website

Developed a veterinary web platform with features like blog section, diagnosis form, eBook downloads and admin/user login system using Flask and SQLite.

Food and Healthy Living Blog

A responsive and user-friendly food blog designed to share Kenyan and international recipes, healthy eating tips, and nutrition insights. The blog features recipe search and filter options categorized posts (e.g., breakfast, dinner, weight loss, weight gain, and traditional meals), and engaging content on healthy lifestyles.

The platform allows users to explore detailed recipes with images, contribute their own food ideas, and interact through comments. Built with **HTML, CSS, JavaScript and Flask (backend integration)**, the blog is optimized for both desktop and mobile users. Its goal is to promote healthy living while celebrating diverse cuisines.

A hotel room occupancy prediction system

Developed a machine learning–based web application that predicts hotel room occupancy using historical booking data, seasonality trends, local events and pricing patterns. Built the backend using Flask and integrated a Random Forest regression model to generate real-time occupancy forecasts. Designed a user-friendly HTML interface and implemented a database system to store predictions for analysis. The system helps hotels optimize staffing, pricing, and operational decision-making.

SKILLS AND COMPETENCIES

- IT support and maintenance
- Computer hardware & software troubleshooting
- Networking (LAN/WAN, routers, switches, cabling)
- Database management (MySQL)
- Data Analysis using Python, Data Entry
- Microsoft Office and google workspace
- Programming: Python, HTML, CSS, JavaScript
- Proficiency in Cloud Based Tools
- Soft Skills: Teamwork, time management, adaptability, communication
- Languages: English, Kiswahili, Kikuyu
